

The hang gliding and paragliding federations of the FAI member countries, in the CIVL Plenary Meeting represented by their delegates, can send in proposals that will be put on the agenda no later than the 12th December 2005.

The following proposal of DHV should be set on the agenda of the CIVL Plenary Meeting 2006 in Lausanne:

In the moment World Championships in hang gliding in 4 different classes are held in two events. One for class 1, and one for class1 women, class2 and class 5.

Due to the fact of growing costs and retrogression of qualified pilots there is no longer need for two separate events. In the last two world championships in womens world and FAI class 5 the classement was filled up with up to 6 pilots/country additional to the national teams of 6 pilots. In the worlds 2004 class 1 women 25 pilots competed, 44 pilots in class 5 and 7 pilots of class 5 were transferred to class 2 to complete this class.

DHV asks for a combined world championship for all classes in one event.

Max. 5 pilots class 1, max 4 pilots class 5 and 2 women class 1 should compete in one event and should be rewarded with the titles of each individuell class and additional with the title of “team world champion hang gliding” in a combined team. Separate single awards should be given for each class only , if represented with more than 10 pilots in the classement.

Details should be discussed in the plenary.

The first combined championship should take place in 16th FAI worlds championship 2007 in Big Springs Texas/USA.

Rudl Buerger
DHV chairman of sport
