

FFPLUM ANNUAL REPORT 2010

The French Microlights Federation has been very active the year 2010 to keep the number of licences, to protect the facilities given to the pilots in France and to promote competitions and Tour de France ULM as well.

However, accidents and fatalities grow up and despite the communication and numerous warning given through the media and the web site, FFPLUM has to work to prevent some of them.

Statistics 2010
